

ISIS Fund Services reaches \$1.5bn in AuA

ISIS Fund Services, the hedge fund administration company led by Ede Conyers and her senior management team, has reached \$1.5 billion in assets under administration after six weeks of operations.

Ede Conyers commented that "our popularity is in large part due to the fact that the Leadership Team have proven track records and have built lasting relationships with clients over the years. Clients are coming to us because they want an administrator that is committed to creating long-term partnerships and delivers a tailored hedge fund administration platform coupled with exceptional client service."

Through the Team's multi level expertise and numerous years of experience, the company brings clients innovative hedge fund administration product solutions that combine unique insight with clear, documented processes, procedures and performance. The ISIS Group of companies meet clients' needs with the provision of formation services, domestic and offshore fund accounting, independent portfolio valuations, corporate secretarial administration, legal consultation, corporate governance and compliance, directorial and shareholder services to the global hedge fund industry.

Jason Bibb, Managing Director, commented that "it has been an exceptional start for the business and credit should be given to everyone in the organisation. In our experience, very few new hedge fund administration start ups have launched with such quick results. Given the strength of the sales pipeline, we are already considering satellite offices in other jurisdictions to give clients the global coverage they are seeking."

ISIS Fund Services was incorporated on 23 May 2007 as a Bermuda exempted company and received its Fund Administrator License under the Bermuda Monetary Authority Investment Funds Act 2006 on 6 August 2007. The business currently employs eight staff, with representatives in Australia.
